✓ French : First language

✓ English : Fluent

PROFILE

I'm a Frontend Developer with a passion for Javascript and React although I've also worked with Vue and Angular in the past.

I love solving problems and I'm always ready to learn new things.

My skills are listed below, but I am always ready to learn new technologies.

PROJECTS

Pizza Ordering App
React, Redux (Toolkit), Styled-components, React Router

React Application for ordering pizza online

EXPERIENCE

DBIT – Internship (Nov 2021 – Jan 2022)
Angular – Angular Material - API

Creation of a Scheduler with Angular (V12). A User Interface that manages an API to Create, Read, Update and Delete the scheduling of a Project or an Application.

I needed to use many tools : Angular Material, Service, Pipe, Routing and Observable for API Calls. The project use Typescript and Sass for the CSS.
